FOREWORD

It gives me great pleasure to officially release the final results of the Economic Census of Cambodia 2022 (EC2022). This nationwide census was conducted from 1 March 2022 to 31 March 2022, with 1 March as the reference date. It is the second establishment listing conducted as a complete count. The first Economic Census was conducted by the Royal Government of Cambodia (RGC), with the support of the Japan International Cooperation Agency, in 2011.

Conducted in compliance with the legal bases set out in the Statistics Law, and Sub-Decree No. 151 dated 2 October 2019, the EC2022 compiles basic statistics on economic activities throughout Cambodia. This information is useful for a variety of stakeholders, including policymakers, national and local or subnational governments, non-governmental organizations, private sector actors, academics, researchers, and development and trade partners. The census data is also an important input for calculating estimates of Cambodia's gross domestic product.

This national report will help inform policy formulation and program development towards achieving more substantive deconcentration and decentralization reform in Cambodia. The results will contribute to the socioeconomic development goals of the RGC in supporting the National Strategy for the Development of Statistics, including statistics-based planning and evidence-based policymaking. I am therefore confident that the census results provide valuable information and insights into socioeconomic development in Cambodia.

I would like to express my profound gratitude to **Samdech Akka Moha Sena Padei Techo HUN SEN, Prime Minister of the Kingdom of Cambodia**, for the unwavering support provided to the Ministry of Planning (MoP) throughout the conduct of the census.

The Economic Census is one of the largest statistical data exercises in Cambodia, involving the collection, processing, analysis and dissemination of data on economic activities nationwide. This huge undertaking would not have been possible without the support and cooperation of all stakeholders. The people I would like to thank are too numerous to list, but the following deserve special mention.

First, I would like to express my heartfelt gratitude to senior officers and staff members of the MoP and the National Institute of Statistics (NIS), as well as to members of the 2021 National Committee for Economic Census and the 2021 Technical Committee for Economic Census, for their steadfast participation throughout the conduct of the census. I am especially indebted to enumerators and supervisors for their dedication and hard work. My sincere gratitude also goes to the staff of line ministries and other related government institutions, as well as the governor of Phnom Penh, provincial and district governors, and commune and village chiefs. Their contributions enabled the successful completion of the EC2022.

I extend my sincere appreciation to the many business and enterprise representatives for sparing their valuable time to participate in the census and for providing information on establishment listings. I am grateful to the World Bank for technical assistance and to the Australian Government for financial support. For informing the public about the 2022 census campaign, my special thanks go to the media, including newspapers, radio and television.

I am grateful to H.E. Rin Virak, Stand-in Secretary of State of the MOP and Director of the 2021 Technical Committee for Economic Census, and H.E. Ms. Hang Lina, Delegate of the RGC and Director General of the NIS, whose leadership and dedication delivered a successful census. But this

could not have been achieved without the assistance of senior officers within the NIS, notably H.E. Chhay Satia, H.E. Khin Song, H.E. Saint Lundy, Mr. Phan Chinda, and Mr. Vern Thy, all of whom are Deputy Director Generals, H.E. Nor Vandy, Director of the Economic Statistics Department, Mr. Chao Pheav, Director of the Data Management, Application Development and Technology Department, Mr. Ly Sophanith, Director of the Information and Communication Technology Department, and Mr. So Tonnere, Deputy Director of the Economic Statistics Department. *So Tonnere*

SECTION I: Outline

Outline of the Economic Census of Cambodia 2022

1. Purpose

1. To develop a nationally comprehensive frame for economic surveys, and to present information on economic activities throughout Cambodia, in compliance with the Law on Statistics and Sub-decree No.151 dated 2 October 2019.
2. To produce statistics on the distribution of establishments and persons engaged, with respect to well-defined characteristics of establishments, such as industry, size, legal status, and regional location.
3. To provide updated information on the business activities of establishments throughout Cambodia.

2. Reference date of census

1 March 2022

3. Duration of census enumeration

One month from 1 to 31 March 2022

4. Legal basis of census

The EC2022 was conducted in compliance with:

1. Statistics Law of Cambodia, Articles 8 and 9
2. Sub-decree No.151, dated 2 October 2019

5. Coverage of the census

The census count covered all establishments existing within the territory of Cambodia on the reference date, 1 March 2022. These establishments included markets, factories, companies, handicraft businesses, online businesses selling goods and services, schools, universities, pagodas, hospitals, and health centers.

However, the EC2022 excluded establishments classified in Section A (Agriculture, Forestry, and Fishery) and Section T (Activities of Household as Employees) of the International Standard Industrial Classification of All Economic Activities (ISIC) Rev.4. Other enumeration units excluded from the EC2022 were mobile establishments, and national/local or subnational government bureaus including diplomatic offices, such as embassies and consulates, and military quarters.

6. Unit of enumeration

Based on the Statistics Division of the Department of Economic and Social Affairs, United Nations, an establishment – the unit of enumeration for the EC2022 – is defined as:

An enterprise or part of an enterprise that is situated in a single location and in which only a single (non-ancillary) productive activity is carried out or in which the principal productive activity accounts for most of the value added.

7. Information collected

1. Name, address and telephone number of establishments, details of contact person
2. Sex of establishment representative and nationality of establishment owner

3. Business registration (Ministry of Commerce or Provincial Department of Commerce)
4. Business license/business approval issuing authority
5. Ownership type (sole proprietorship, partnership, limited liability company, other)
6. Divisional structure of establishment (single unit, head office or branch office)
7. Tenure and business location (type and area)
8. Business hours
9. Year of business establishment
10. Number of persons engaged by sex, employment status and nationality (one week prior to 1 March 2022)
11. Main business activity of head offices (industrial classification)
12. Number of branch offices, if any
13. Total number of permanent employees (at the end of December 2021)
14. Main and secondary business activities of head offices and branches (industrial classification)
15. Bookkeeping records (balance sheet, income statement)
16. Total sales, operating expenses, wages/salaries (daily/monthly), number of working days (in February 2022 or prior)
17. Total assets at the end of December 2021
18. Total equity at the end of December 2021
19. Total non-current liabilities at the end of December 2021
20. Total current liabilities at the end of December 2021
21. Total revenues and expenses in 2021
22. Online transactions and impacts of Covid-19

8. Field organization

1. Ministry of Planning (NIS)
2. 135 provincial coordinators (mostly directors of the Provincial Planning Department)
3. 499 supervisors (mostly NIS officials)
4. 5326 enumerators (mostly officials of Provincial or District Departments of Planning)
5. Data collector training, which officially commenced in February 2022

9. Method of census enumeration

1. Enumerators visited each establishment within their assigned enumeration area, interviewed an owner or a manager or a representative of the establishment, and filled in the census form.
2. If self-enumeration was opted for, an owner or a manager or a representative of the establishment filled in the census form.
3. A Special Survey Team was on standby to take charge of enumeration should an originally assigned team be unable to complete its tasks before 20 March 2022.

10. Enumerators

The NIS employed 5,326 temporary enumerators to carry out the EC2022. Each enumerator was assigned one or two villages, or alternatively one enumeration area. Refer to the Enumerators' Manual (available at <https://nada.nis.gov.kh/index.php/nis-nada>) for the demarcation of enumeration areas.

11. Supervisors

The NIS employed 499 temporary supervisors. Each supervisor was tasked to oversee a team of several enumerators, as described in the Supervisors' Manual (available at <https://nada.nis.gov.kh/index.php/nis-nada>).

12. Training of local staff, supervisors and enumerators

1. The NIS provided two sets of training to provincial staff at the MoP: a two-day training course on 14 and 15 December 2021, and a five-day training workshop from 17 to 21 January 2022.
2. A five-day training workshop for trainers of trainees (TOTs) was organized at MoP/NIS, starting from 13 and 17 February 2022.
3. A five-day training workshop, from 20 to 24 February 2022, was delivered to district and commune chiefs, supervisors and enumerators in all provinces.
4. Core staff and TOTs, drawn from a pool of NIS personnel, were charged with organizing both training workshops.
5. The TOTs acted as regional officers and assistant regional officers for the duration of the data collection stage.

13. Mapping

The village boundary maps used in the census were drawn based on the village maps from Cambodia's 2019 Population Census. Large villages with numerous establishments were divided into enumeration areas for which enumeration area maps were drawn. Both maps were used to instruct enumerators about their assigned enumeration areas.

14. Pre-test and pilot surveys

1. Pre-test
 - a) The pre-testing of the questionnaire was carried out from 22 to 26 November 2021 in three different regions: Phnom Penh, Svay Rieng and Takeo.
 - b) The aim was to test various components of the EC2022, including the questionnaire design, enumeration methods, and the Enumerators' Manual.
 - c) Results from the pre-tests helped to finalize the instruments of the EC2022.
2. Pilot surveys
 - a) Pilot surveys were conducted from 1 to 12 December 2021 in approximately 100 villages/enumeration areas, selected using sampling theory and covering all provinces.
 - b) All large establishments (100 or more persons engaged) in the selected villages/areas were enumerated.
 - c) The aims were to:
 - (1) Test the final drafts of the census form and other documents
 - (2) Test the work procedures, guiding at each stage of enumeration the enumerators, supervisors, local or sub-national government personnel and NIS staff
 - (3) Test the tabulation methods to be adopted
 - (4) Collect statistical data on small, medium and large enterprises.

15. Submission of documents

1. Enumerators submitted all EC2022-related documents including the census forms, after checking them thoroughly, to their supervisors before 1 April 2022.
2. Provincial census officers inspected and submitted all EC2022-related documents to NIS census officials before 20 April 2022.

16. Tabulation and data processing

1. Preliminary results

The completed establishment lists and summary sheets were reviewed and data entered into the computers located on NIS premises. The data was tabulated and presented as the preliminary results of the EC2022.

2. Final results

- a) Provincial teams edited and coded the data manually at the NIS, concurrently with the NIS's procurement of completed census forms and EC2022-related documents. These documents were filed systematically and kept in secure storage on the NIS premises.
- b) Provincial teams entered and then edited the data manually on computers at the NIS. This data cleaning process involved identifying and fixing incomplete, incorrect, duplicate or erroneous data in a data set.

3. Analysis of results

The results were analyzed from various viewpoints.

4. Census Atlas

Statistical maps of the entire territory of Cambodia and of each province were drawn.

5. Directory of establishments

A database containing information about establishments, entities, and administrative area codes was constructed as the sampling frame for economic survey sampling, and also for other uses.

17. Dissemination

The EC2022 results were released to the public through dissemination workshops and the media, including newspapers and the internet, on the following dates:

1. Preliminary results in January 2023
2. Final results in October 2023

18. Statistical tables

1. Cross-tabulation of distributional statistics for different categories: number of persons engaged, sex of representative, main business activity, and province.
2. Average number of persons engaged per establishment, average sales and expenses per entity or enterprise.

19. Safekeeping of census forms and related documents

The census forms and other related documents were in the express care of enumerators, supervisors, and were securely stored at local or subnational government offices and subsequently at the NIS, in compliance with Article 22 of the Statistics Law.

20. Post-census work

1. To identify and rectify any coverage problems and content errors in the EC2022, a post-enumeration survey was conducted in May 2022 in 100 villages selected using sampling theory.
2. The Cambodia Inter-censal Economic Survey is planned for March 2026, using the Directory of Establishments constructed from the EC2022. The aim is to provide updated statistics on the economic activities of establishments and enterprises in Cambodia, and at the same time to enhance the capacity and capability of the NIS to conduct economic censuses and surveys.

Explanation of Terms

The numbers in parentheses refer to questions on the census form.

Establishment

An establishment is a business or enterprise that occupies a particular building, premises or place where its economic activities are performed, and fulfills the following conditions in principle:

- (1) It is a place which occupies a certain space (one plot) and in which economic activities are performed under a single manager.
- (2) It has equipment, engages one or more persons, and produces and/or sells goods or provides services on a continuous basis.

The International Standard Industrial Classification (ISIC) Rev.4 of the United Nations defines an establishment as “an enterprise, or part of an enterprise, that is situated in a single location and in which only a single (non-ancillary) productive activity is carried out or in which the principal productive activity accounts for most of the value added”.

There are three kinds of establishments: fixed, movable, and mobile. Fixed establishments always perform economic activities in a fixed place or building. Movable establishments always carry out economic activity in a fixed place but can easily move to another place. And mobile establishments carry out business on the move. This report includes street business.

Coverage

The EC2022 covered establishments in all but two ISIC sections, excluding Section A (Agriculture, Forestry and Fishery) and Section I (Household Activities). However, establishments which process agricultural, forestry and fishery products were included under Manufacturing (Section C). Following the UN’s definition of establishment, businesses without a fixed location were not included in the EC2022. National/local government offices including military quarters and diplomatic offices were also excluded.

Entity

An entity is a generic term used to refer to a single unit establishment (single unit entity) or a group of establishments consisting of a head office in Cambodia and branch offices within or outside Cambodia (multi unit entity).

Representative of establishment (Q3-1)

The representative of an establishment is a person who manages its activities but does not necessarily own it.

Nationality of establishment owner (Q3-3)

The owner of an establishment is the person who owns it. In the case of joint ownership, the nationality of the largest shareholder prevails; in the case of equal shares between a Cambodian and a foreigner, the nationality is set as Cambodian.

Ownership/legal status of establishment (Q5)

1. Sole proprietor (with no registration)

This refers to individual proprietors other than sole proprietors.

2. Sole proprietor (with registration)

This refers to individual proprietors who have registered their business at the Ministry of Commerce or Provincial Departments of Commerce in accordance with the Law on Taxation (or the Law on Commercial Rules and Register).

3. General partnership

This refers to an economic organization which is operated under “a contract between two or more persons to combine their property, knowledge or activities to carry on business in common with a view to profit”, as defined in Article 8 of the Law on Commercial Enterprise.

4. Limited partnership

This refers to an economic organization which is operated under “a contract between one or more general partners who are the sole persons authorized to administer and bind the partnership, and one or more limited partners, who are bound to contribute the capital of the partnership”, as set out in Article 64 of the Law on Commercial Enterprise.

5. Single member private limited company

This is a limited company that allows 100 percent ownership by a single individual.

6. Private limited company

This is a limited company that meets the following requirements stipulated in Article 86 of the Law on Commercial Enterprise:

- a. The company may have 2 to 30 shareholders.
- b. The company may not offer its shares or other securities to the public generally, but may offer them to shareholders, family members and managers.

7. Public limited company

This is “a form of a limited company that is authorized by this law [Law on Commercial Enterprises] to issue securities to the public” as defined in Article 87.

8. Interest in joint business

This refers to a business partnership aimed at creating a mutually beneficial business structure.

9. Public enterprise

Annual sales, expenses, and profit and loss (Q16 and 21)

Annual sales (Q16 and 21)

1. For entities with a balance sheet or income statement:

The amount is for 2021 and is the sum of operating revenues (Q21-1) and other revenues (Q21-4).

2. For entities without a balance sheet or income statement:

The amount was estimated based on the average daily or the monthly figure for February 2022, the month immediately before the census month, or the most recent month. Estimates were calculated by multiplying the average daily figure by 365 or the monthly figure by 12.

Annual expenses (Q16 and 21)

1. For entities with a balance sheet or income statement:

The amount is for 2021 and is the sum of operating costs (Q21-2), operating expenses (Q21-5), interest paid to residents [a person who lives in a particular place or location, usually for an extended period of time] (Q21-6), interest paid to non-residents [a person who does not live in a particular place or location on a permanent or long-term basis] (Q21-7), and profit tax (Q21-9).

2. For entities without a balance sheet or income statement:

The amount is estimated from the average daily or the monthly figure for February 2022, the month immediately before the census month, or the most recent month. Estimates were calculated by multiplying the average daily figure by 365 or the monthly figure by 12 .

Annual employees' salaries and wages (Q16 and 21)

1. For entities with a balance sheet or income statement:

The amount is for 2021 and is the response to Q21-5-1 (employee's salaries and wages) which excludes salaries and wages for managers and workers in the production section (those salaries and wages are included in Q21-2-1).

2. For entities without a balance sheet or income statement:

The above description for "annual expenses" applies with Q16-2 (expenses) being replaced with Q16-2-1(employee's salaries and wages).

Annual profit and loss

Annual Profit and Loss = Annual Sales - Annual Expenses

Ratio of labor costs to sales

Ratio of Labor Cost = Annual Salaries and Wages / Annual Sales × 100

Gross margin

The gross margin is the difference between operating revenue (Q21-1) and operating costs (Q21-2)

Non-current assets (fixed assets; Q17-1)

Total amount of the following items at the end of December 2021:

Operating expenses (Q21-4)

1) Salaries and wages, 2) fuel, gas, electricity and water, 3) travel and accommodation, 4) transport, 5) rent, 6) repair and maintenance, 7) entertainment, 8) commission, advertising, and selling, 9) other tax expenses, 10) donation expenses, 11) management, consultant,

technical support, and other similar services, 12) royalty expenses, 13) bad debts written off, 14) amortization/depletion and depreciation, 15) increase/decrease in provisions, 16) loss on disposal of fixed assets, 17) realized exchange loss, 18) unrealized exchange loss, 19) other costs. This list excludes expenses incurred in the production section which are included in Q21-2-1.

Industrial classification of establishments/entities (Q11)

The industrial classification of an establishment is determined by its main business activities following the International Standard Industrial Classification, Revision 4.

Brief Analysis of the Final Results of the Economic Census of Cambodia 2022

The Economic Census of Cambodia 2022 (EC2022) was conducted with 1 March 2022 as the reference date and covered all fixed and movable establishments throughout Cambodia. After over a year of data processing and analysis, the final results of the EC2022 were released in August 2023 and are summarized below:

1. Total number of establishments was 753,670

As of 1 March 2022, there were 753,670 establishments in Cambodia. The number of persons engaged in these establishments totaled 2,980,569, comprising 1,139,207 (38.2%) males and 1,841,362 (61.8%) females (Table 1.1 and Table 11.1.1). Excluding street businesses, the number of establishments amounted to 676,597 and the number of persons engaged in these establishments amounted to 2,864,256 (Table 1.7.1 and Table 11.7.1).

Compared with the results of EC2011, the number of establishments in 2022 increased by around 49%, with an annual growth rate of 3.7%. During the same period, the number of persons engaged increased by 70.9%, resulting in an annual increase of 5.0%, which was significantly higher than the population growth rate of around 1.4%.

Cambodian-owned establishments accounted for 99.1% of all establishments in Cambodia in 2022 (Table 2.2.1 and Table 2.2.3). Of the total number of establishments, 747,010 (99.1%) were owned by Cambodians, 2,608 (0.3%) by Chinese, 1,581 (0.2%) by Vietnamese, 1,198 (0.2%) by other Asian nationalities, and 439 (0.1%) by South Koreans. Overall, the share of foreign-owned establishments throughout Cambodia was less than 1%. A similar pattern was observed in 2011, when Cambodian-owned establishments accounted for 98.9% of all establishments.

Compared to EC2011, the number of establishments excluding street businesses increased by 213,234 (46%), while the number of street businesses increased by 35,302 (84%). This suggests that street businesses experienced a higher growth rate than other establishment types between 2011 and 2022.

2. Establishments engaging one or two persons accounted for more than 80%

Of the total number of establishments, 621,028 or 82.4% engaged one or two persons, and 253,857 (33.7%) engaged two persons. Thus, small businesses engaging one or two persons accounted for the majority of the total (Table 1.1).

Establishments engaging five or more persons formed the next largest group, accounting for 53,724 (7.2%) of the total, followed by 20,820 (2.8%) with 10 or more persons, 1,870 (0.2%) with 100 or more persons, and only 295 establishments with 1,000 or more persons. Therefore, large establishments accounted for a very low proportion (Table 1.1).

At the same time, the number of persons engaged in establishments with five or more persons engaged was around 1.84 million, accounting for 61.9% of the total persons engaged, followed by 1.63 million (55.0%) in establishments with 10 or more persons engaged, 1.21 million (40.8%) in those with 100 or more persons engaged and only 663,426 persons (22.3%) in establishments with 1,000 or more persons engaged. This implies that despite being few in number, large establishments in Cambodia employed a significantly large share of the workforce (Table 11.1.1).

3. New establishments numbered 241,821, accounting for almost one third

The 241,821 new establishments, which started business between 1 January 2020 and 1 March 2022, accounted for 32.1% of the total. Many of these were set up in January 2020 or shortly afterward, even as the coronavirus epidemic was taking hold (Table 1.9.1).

4. The number of street businesses was 77,073

Street businesses (stalls, kiosks, and the like that run at a fixed location on the sidewalk or the roadside) accounted for 10.2% of the total number of establishments. About 75% of street businesses were represented by women and 89% of them employed one or two persons (Table 1.7.1).

5. Sole proprietorship accounted for 96.5%

Sole proprietorship or physical person establishments amounted to 734,739, accounting for 96.5% of all establishments in 2022 (Table 1.4.1). This implies that most establishments in Cambodia were owned and operated by one person. Additionally, the number of persons engaged in these establishments was 2,814,775, accounting for 94% of total persons engaged (Table 11.4.1). This result is almost the same as that in EC2011, when sole proprietorship also accounted for the vast majority (96%) of establishments.

6. “Owned” accounted for nearly 73% of responses to tenure of business place

Looking at tenure type, 72.7% of all establishments owned their business place, indicating a high rate of ownership (Table 1.6). This represents a modest increase since 2011, when 67.8% (also a high proportion) of all establishments had this tenure.

7. Almost 61% of establishments had areas of more than 10m²

For area of business place, establishments with areas of more than 10m² accounted for nearly 61% of the total. This result indicates an improvement since 2011, when almost 50% of establishments had areas smaller than 10m². At the same time, establishments with an area of 100m² or more accounted for 12% of the total, an almost 5 percentage point increase from 7.2% in 2011 (Table 1.8.1).

8. “Wholesale and retail trade and repair of motor vehicles and motorcycles” accounted for nearly 66% of all establishments

“Wholesale and retail trade and repair of motor vehicles and motorcycles” (Section G) was the largest section by ISIC, with 494,552 establishments or 65.6% of the total. The second largest section was “accommodation and food service activities” (Section I), with 106,977 establishments, representing 14.2% of the total. This section includes restaurants and mobile food service activities (Class 5610). “Manufacturing” (Section C) had 50,028 establishments, or 6.6% of the total. “Other service activities” (Section S) had 52,378 establishments, which was 6.9% of the total. This section includes activities such as hairdressing and other beauty treatments (Class 9602). “Human health and social work activities” (Section Q) had 12,220 establishments, or 1.6% of the total. This includes “medical and dental practice activities” (Class 8620) and “hospital activities” (Class 8610). “Education” (Section P) had 12,283 establishments, which was also 1.6% of the total. This section was dominated by “pre-primary and primary education” (Class 8550) (Table 2.1.1 and Table 2.10).

In terms of the number of persons engaged by ISIC section, the largest sector was "manufacturing" (Section C), dominated by “wearing apparel, except fur apparel (1410)”, “footwear (1520)” and “luggage, handbags and the like (1512), with 1,116,671 persons accounting for 37.5% of the total. This indicates that the manufacturing sector was a significant employer in the economy. "Wholesale and retail trade and repair of motor vehicles and motorcycles" (Section G) was the second largest sector employing 920,674 persons (30.9%), followed by "accommodation and food service activities" (Section I) with 287,486 persons (9.6%), "education" (Section P) with 209,330 persons (7%), and "other service activities" (Section S) with 112,159 persons (3.8%) (Table 12.10.1).

It should be noted that “wholesale and retail trade and repair of motor vehicles and motorcycles” (Section G) was the largest section in 2011 with 553,493 persons, accounting for 33.1% of the total, while “manufacturing” (Section C) ranked second, employing 530,341 persons, equivalent to 31.7% of the total.

9. For new establishments, “wholesale and retail trade and repair of motor vehicles and motorcycles” accounted for 66.5%

In terms of new establishments by ISIC section “wholesale and retail trade and repair of motor vehicles and motorcycles” (Section G) was the largest section with 157,795 establishments, accounting for 66.5% of the total. The second largest was “accommodation and food service activities” (Section I) with 40,479 establishments (16.7% of the total), followed by “other service activities” (Section S) with 19,203 establishments (8.0%) and “manufacturing” (Section C) with 12,560 establishments (5.0%) (Table 2.9.1).

10. Among new establishments, “wholesale and retail trade and repair of motor vehicles and motorcycles” ranked first in terms of persons engaged (43%)

In terms of persons engaged in the new establishments by ISIC Section, “wholesale and retail trade and repair of motor vehicles and motorcycles” (Section G) was the largest section with 275,355 persons, accounting for 43.2% of the total persons engaged in new establishments. The second largest section was “manufacturing” (Section C) with 176,352 persons (or 27.7% of the total), followed by “accommodation and food service activities” (Section I) with 94,804 persons (14.9%), and “other service activities” (Section S) with 33,751 (5.2%) (Table 12.9.1).

11. For street businesses, “wholesale and retail trade and repair of motor vehicles and motorcycles” accounted for 64%

Analysis of street businesses by ISIC section found that the largest number came under “wholesale and retail trade and repair of motor vehicles and motorcycles” (Section G), with 48,657 establishments accounting for 64% of all street businesses. The second largest group, 18,014 establishments (23.4%), were involved in “accommodation and food service activities” (Section I), followed by 4,738 (6.1%) in “other service activities” (Section S) (Table 2.7.1). This distribution pattern is comparable with that found in EC2011, where Section G and Section I dominated street business activities.

12. Phnom Penh accounted for almost one fifth of all establishments in Cambodia and nearly one third of persons engaged

The number of establishments in Phnom Penh amounted to 149,888, accounting for 20% of all establishments – the largest share across Cambodia. Kandal had the second largest share with 57,125 establishments (7.6%), followed by Siem Reap 50,714 (6.7%), Battambang 49,748 (6.6%) and Takeo 45,364 (6.0%) (Table 3.1). Phnom Penh was also observed to have the largest number of establishments in 2011.

In terms of the number of persons engaged, Phnom Penh ranked top in 2022 with 930,916 persons, accounting for 31.2% of all persons engaged. Kandal had the second largest share with 286,860 (9.6%), followed by Kampong Speu 207,104 (6.9%), Takeo 167,456 (5.6%), and Svay Rieng 150,439 (5.0%) (Table 13.1.1). Again, Phnom Penh was also observed to have the largest share of persons engaged in 2011.

13. New establishments in Phnom Penh and Kandal accounted for more than 30% of all new establishments

Phnom Penh had the largest number (53,874) of new establishments in 2022, accounting for 22.3% of the total. Kandal ranked second with 18,578 new establishments (7.7%), followed by Siem Reap 17,104 (7.1%) and Battambang 15,991 (6.6%) (Table 3.9.1).

14. New establishments in Phnom Penh, Kandal and Kampong Speu accounted for nearly 50% of all persons engaged in new establishments

In terms of the number of persons engaged in new establishments, Phnom Penh had the largest number with 192,655, accounting for 30.2% of the total, followed by Kandal 64,929 (10.2%) and Kampong Speu 50,840 (8.0%) (Table 13.9.1).

15. Annual sales in Cambodia were about USD 51 billion

The combined annual sales of entities in Cambodia amounted to USD 50.7 billion. With annual sales of USD 18.6 billion, large establishments with 100 or more persons engaged had the highest share, accounting for 36.7% of the total. In second place came establishments with two persons engaged with annual sales of USD 6.1 billion (12.1%), followed by those with one person engaged USD 5.6 billion (11.2%), 20 to 49 persons engaged USD 5.5 billion (10.9%), 50 to 99 persons engaged USD 4.2 billion (8.4%), and 10 to 19 persons engaged USD 3.6 billion (7.1%). Overall, the annual sales

of establishments with 20 or more persons engaged accounted for just over 50% of the total (Table 21.1).

16. Average annual sales per entity were USD 67,252

Average annual sales per entity in Cambodia were USD 67,252. When decomposing annual sales per entity by sex of representative, those with male representatives earned USD 133,541 whereas those with female representatives earned USD 37,686. This indicates that male-led or owned enterprises earned four times more than female-led or owned enterprises (Table 21.2).

17. Larger-scale entities had higher annual sales

When analyzing annual sales per entity based on the number of persons engaged, entities with 1,000 or more persons engaged earned the highest amount of USD 24.9 million. Those with 500 to 999 persons engaged earned USD 11.3 million, while those with 100 to 499 persons engaged earned USD 6.1 million. Entities with 50 to 99 persons engaged earned USD 2.6 million (Table 21.2). Basically, larger entities tended to generate higher sales than smaller ones.

18. Annual sales of “wholesale and retail trade and repair of motor vehicles and motorcycles” accounted for more than 30%

When analyzing annual sales by ISIC section, “wholesale and retail trade and repair of motor vehicles and motorcycles” (Section G) had the highest share with USD 16.1 billion, accounting for 31.7% of the total. Annual sales for “manufacturing” (Section C) amounted to USD 12.8 billion (25.2%), “financial and insurance activity” (Section K) USD 10.4 billion (20.6%), and “accommodation and food service activities” (Section I) USD 2.6 billion (5.1%) (Table 22.1).

19. Annual sales of Phnom Penh-based establishments accounted for almost 38%

Analysis by province showed that establishments in Phnom Penh had the highest annual sales, amounting to USD 20.0 billion, accounting for 37.5% of the total. At USD 4.0 billion (7.9%) establishments in Kandal had the second highest annual sales, followed by those in Svay Rieng USD 3.3 billion (6.5%), Takeo USD 2.3 billion (4.5%), Kampong Speu USD 2.3 billion (4.5%), and Siem Reap USD 2.2 billion (4.4%) (Table 23.1).

20. Economy of Cambodia had a high-cost structure in industry and service sector

Annual expenses of USD 38.6 billion set against annual sales of USD 50.7 billion resulted in annual profit and loss of USD 12.1 billion. This indicates that annual expenses accounted for 76% of annual sales, while profit and loss represented just 23%. This high-cost structure of Cambodia's industry and service sectors could be due to the country's heavy reliance on imports of materials and goods, combined with relatively low domestic production. To promote domestic production and move away from this high-cost economy, it is critical for Cambodia to address this issue as part of its future socioeconomic development (Table 21.1, Table 24.1 and Table 27.1).

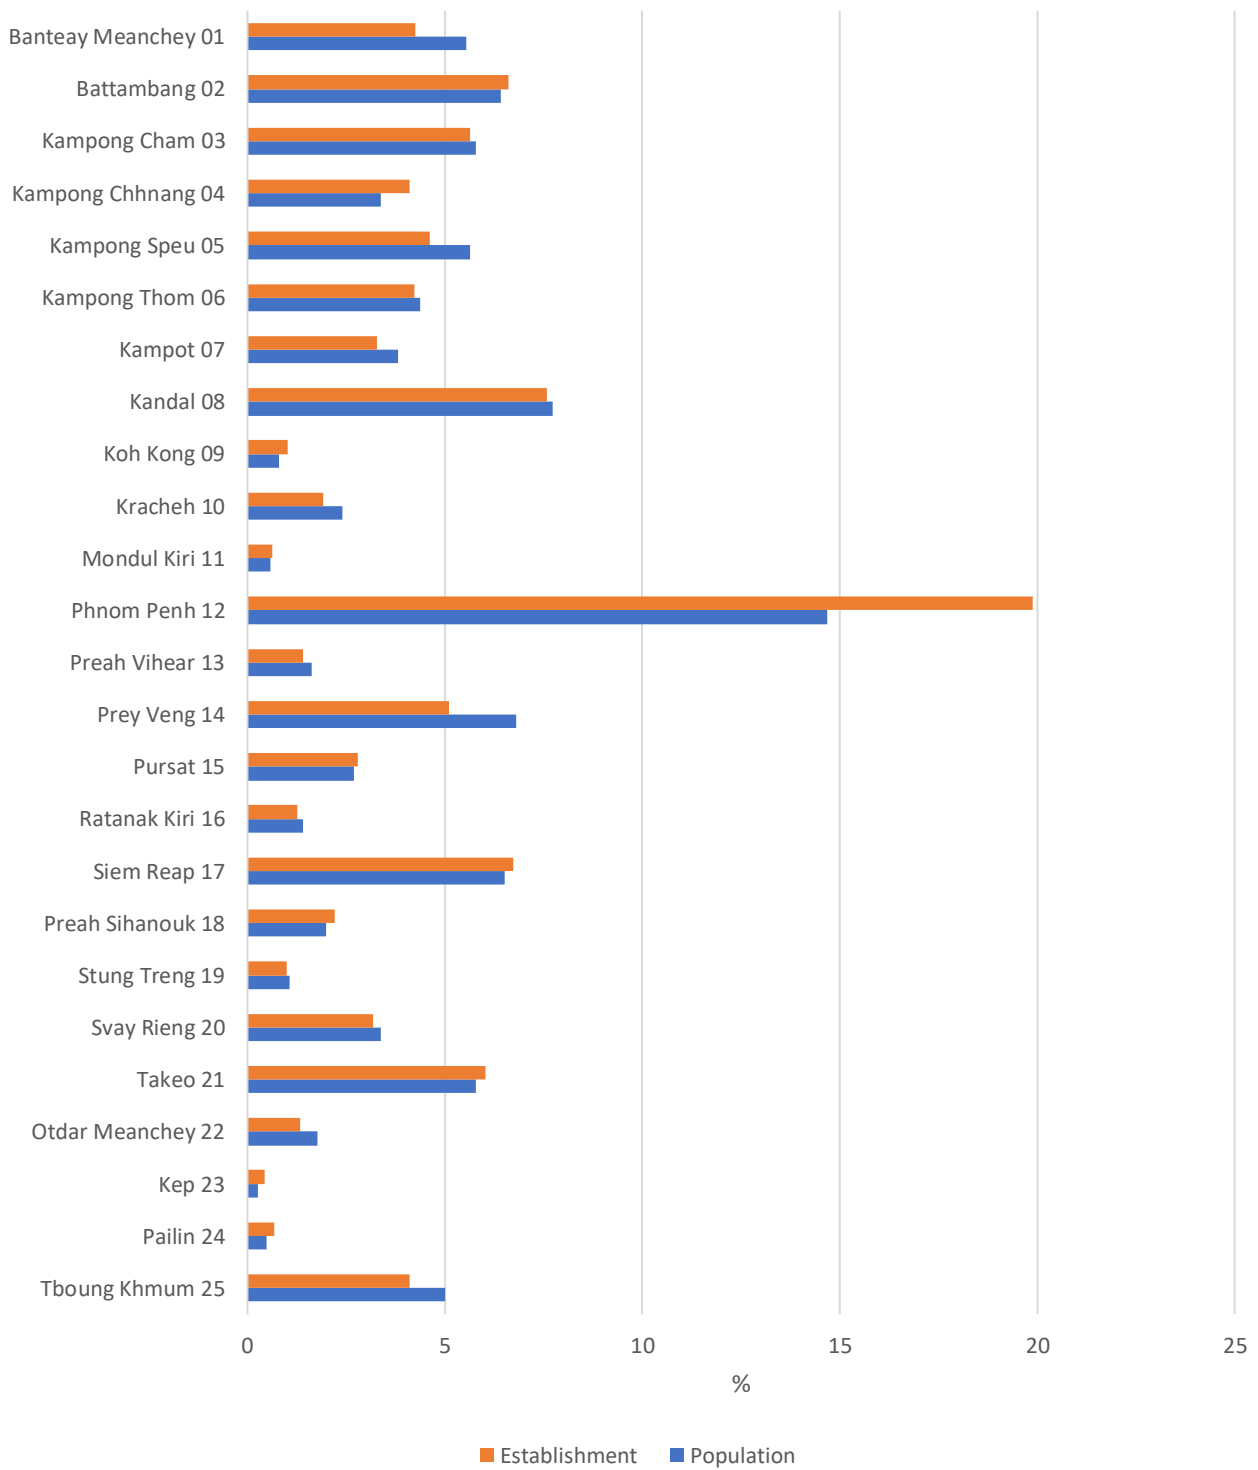

21. Around 81% of establishments, including those in manufacturing, wholesale and retail trade, and accommodation and food service activities, reported being affected by the Covid-19 pandemic

The pandemic crisis has had significant negative impacts on business activities, including decreased revenue, increased expenditure, decline in market demand, and a lack of working capital. Among the establishments affected by the pandemic, 587,793 (34.8%)⁹ reported lower revenues in 2022, 433,703 (26.6%) reported higher expenditures, 212,760 (12.6%) reported declines in market demand and 153,878 (9.1%) reported a lack of working capital (Table 5.1).

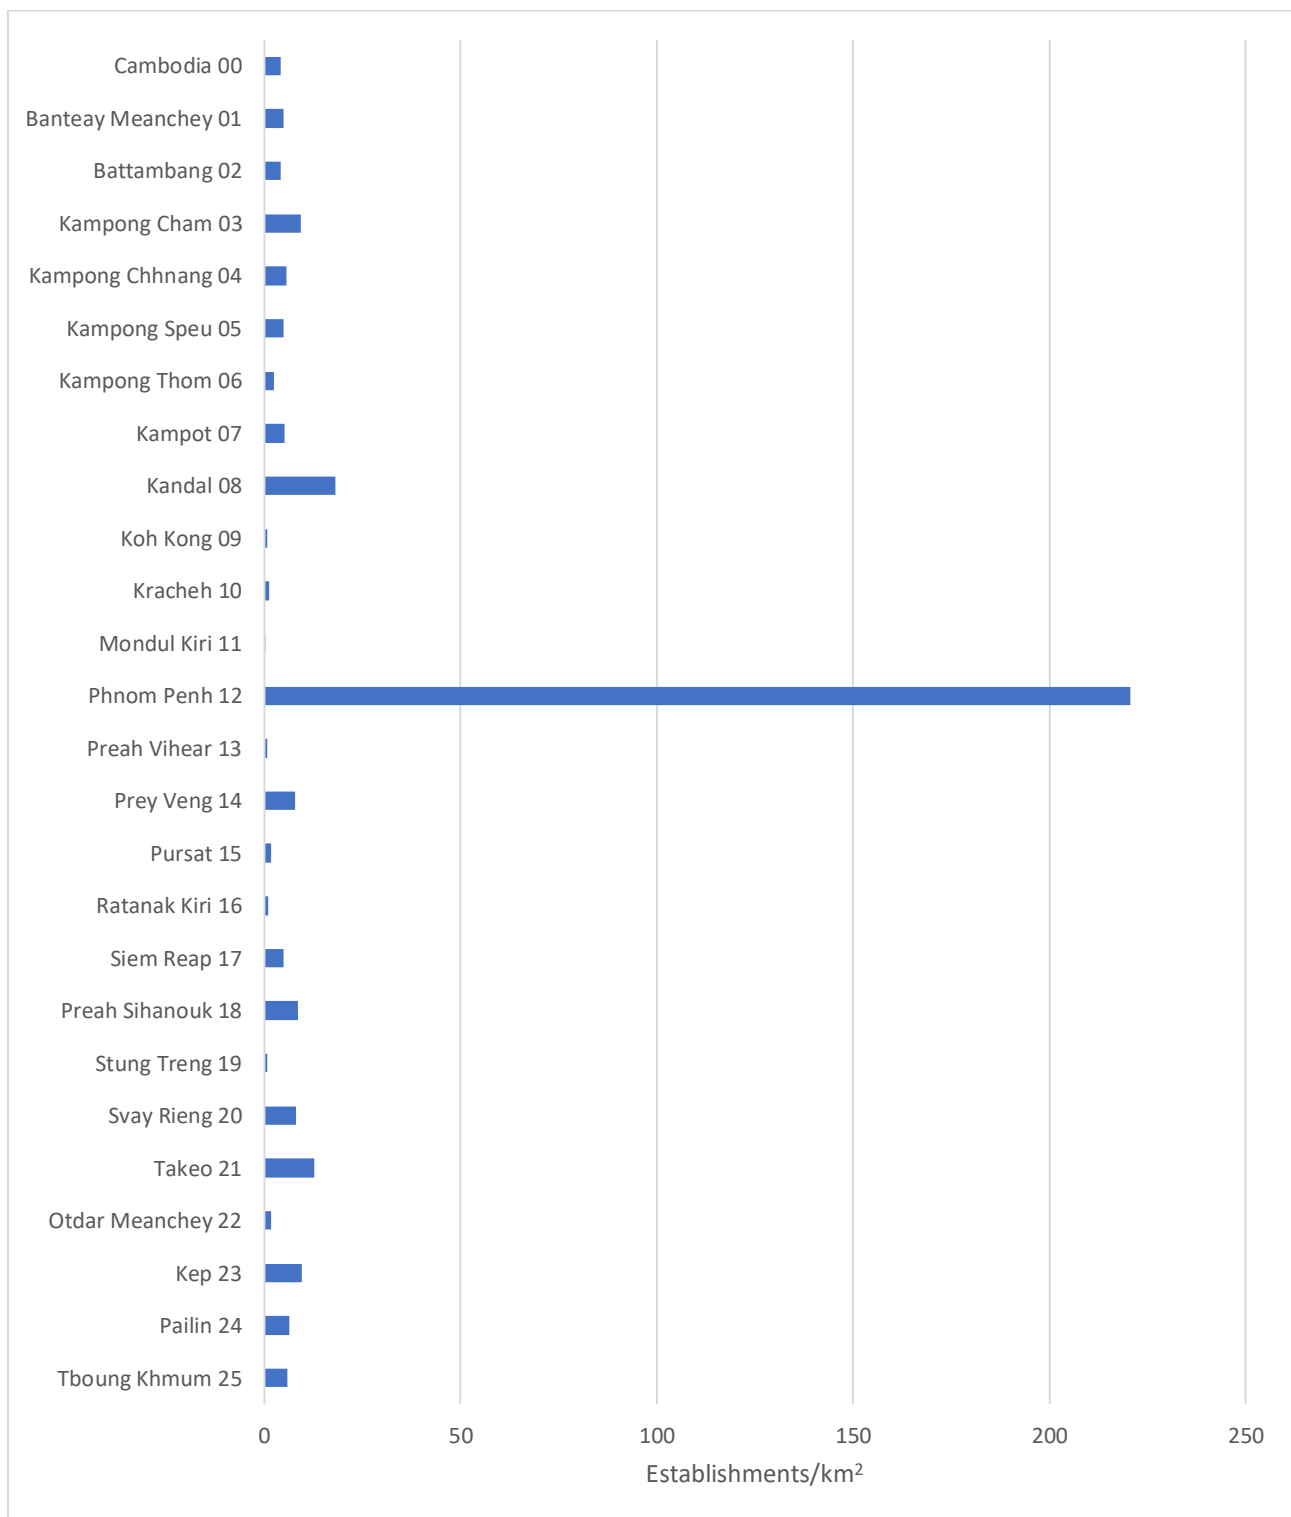

⁹ This percentage is the share of the number of cases for that category to total reported cases. Each establishment could report more than one case because it was a multiple-choice question.
